DS-80 **YOUR COMPACT** **MAILROOM** **ASSISTANT**

The easy-to-use Folder Inserter that grows
with your business

WE VALUE YOUR MAIL 

DS-80

YOUR COMPACT MAILROOM ASSISTANT

DS-80 is just right for your business. Whatever application your business comes across, the DS-80 handles them all. Should applications change or grow with your business, you know that your investment is protected, because DS-80 can simply be expanded or upgraded. After all, the biggest constant in business is still change. All your applications can be handled, from invoices to mail shots, including even documents with the address at the bottom.

EVERY KIND OF APPLICATION

Thanks to Neopost's unique flexFeed technology, you can load any document size in each of the 6 feeders. The variety in applications is up to you. Furthermore you don't need to fan documents before loading.

PROFESSIONAL MAIL PIECE

Collating the documents before folding is not only faster than collating in the envelope, it also ensures a perfect presentation and reduces the risk of jams.

EASY TO USE - EASIER THAN A PHOTOCOPIER

LOAD'N GO - NO SPECIAL SKILLS REQUIRED

HIGH PRODUCTIVITY IN A VERY SMALL FOOTPRINT

LOW NOISE LEVEL - FOR ANY ENVIRONMENT

MODULAR - IT CAN GROW WITH YOUR BUSINESS

OPTICAL MARK RECOGNITION (OMR)

Using a sequence of marks, the DS-80 is able to securely process sets of documents with a varying number of pages to ensure they reach the correct recipient. With Flex-OMR, the DS-80 can 'read' all OMR codes.

MAIL INTEGRITY AND ACCURACY

Equip your Folder Inserter with Mail Piece Production Control. This ensures total quality control of your mail batch and identifies missing or out-of-sequence letters.

INCREASE PROFITS WITH PRINTMACHINE SOLUTIONS

Increase the capabilities of your Folder Inserter and automate your entire document creation process with Neopost's PrintMachine software solutions. PrintMachine simplifies the creation and delivery of customer communication and helps you access postal discounts. It will shorten document creation cycles and increase profitability for your company.

DOUBLE SECURITY

To ensure that every recipient gets the correct mail piece, Neopost's electro-mechanical thickness detection protects against double feeding. It is unaffected by dust, toner or coloured paper. The DS-80 measures the thickness of every document from each feeder (secure'n Feed) and the thickness of the set (secure'n Sert) right before inserting.

POWERFOLD

With Powerfold you can crisply and silently fold up to 10 pages in half, or 8 pages in three. The clam shell design of the DS-80 guarantees easy access to the folder.

FEEDER SWAP

Continuous operation is achieved by cascade feeding. If one feeder runs empty, another one takes over.

DIVERT'N CONTINUE

To avoid stoppages and maximise efficiency, the intelliDeck diverts duplicate or faulty documents before folding while the system is still running.

EASE-OF-USE

Everybody can use the DS-80. Just look at two smart but simple Neopost inventions: the reversible full colour touch screen and load'n Go. Both will give you ultimate ease-of-use. No need for trained operators thanks to load'n Go. Just load documents and envelopes'n press the button to Go! The DS-80 will adjust all settings automatically and even save them to the memory for instant recall.

ENVELOPE SEPARATION

The unique envelope separation mechanism is designed to feed a wide variety of envelope types. This means maximum productivity and ease-of-use.

MAXIFEEDER

Load up to 1,200 sheets or 325 BRE's in the optional maxiFeeder.

GROWING WITH YOUR NEEDS

The DS-80 can be expanded from 2 up to 6 stations at any time, providing additional capacity and protecting your investment.

OUTPUT CAPACITY

With its standard conveyor stacker for up to 150 filled envelopes, the DS-80 guarantees maximum output productivity.

SPECIAL FEEDERS

These optional feeders have been specially designed to feed a wide variety of paper types, including coated material and even small booklets.

DAILY MAIL

The Daily Mail mode allows you to process up to 10 sheets fed by hand, stapled or unstapled.

EXCELLENT ACCESSIBILITY

DS-80 gives you quick, safe and easy access to all parts of the paper path. You will quickly be up and running again if there is a break in production.
