Electric Height Adjustable Tables

Electric Height Adjustable tables are ideal for the stable and comfortable operation of franking machines, address printers and folder inserters.

You can change the height by up to 30cm simply and quickly with just the touch of a button – ensuring you and your staff always operate more safely, efficiently and productively. You can even synchronise multiple table height adjustment.

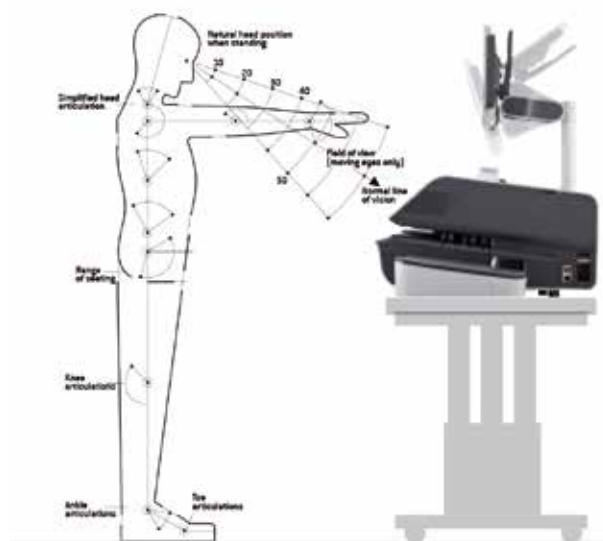

DS-90 Folder inserter

The Electric Height Adjustable table allows each operator to simply and quickly adjust the working height, at the touch of a button, to one that is comfortable for them. When teaming this product with our Folder Inserter range we eliminate risks associated with working at uncomfortable heights.

Improve productivity

- Safe lowering or raising of the equipment
- Provides an opportunity for operators to avoid bending – a health benefit
- An ergonomic solution for standing operators
- Adjustable height for operators of different heights
- Fully mobile, the unit may be re-located with ease
