Introducing Track Inside by Neopost

Barcode technology and **mobile terminals** track letters, parcels or packages as they enter, move through and exit **single site or multiple sites**. Item status is monitored during **receipt, transit and delivery phases**. Each item can be tracked from delivery to the final recipient with the capture of an **electronic proof of delivery and/or picture**.

Benefits for your Organisation

Improve productivity

Save time checking deliveries, locating items, advising status to recipients, managing paperwork and updating system

Satisfy customers

Speed up internal delivery, control losses or delays, inform recipients and respond quickly and accurately to queries

Consolidated traceability

Single traceability database shares and consolidates data from multiple users, regardless of their location

Total security

Integrity and confidentiality is guaranteed by hosting on Neopost servers in a secure professional Data Centre

Easy to implement

Turnkey solution and subscription terms require no initial investment, allowing you to control your budget

No IT investment

Cloud-based and hosted software requires no IT infrastructure investment or software installation on work stations

How Track Inside Works

SCAN

- Scan at any stage of the receipt or distribution process
- Scan existing barcode or allocate new barcode and add tracking label to items with no barcode or parcels with several barcodes
- Shared and personal address books store contact details of recipients, facilitating input of objects and structuring the delivery information

TRACK

- Each scan records the time, date and place of tracking
- Add comments, updates or photos
- Database stores the scanning history, including proof of delivery documents and photos
- Access to full tracking and search tool is made secure via user accounts. Public tool provides simplified tracking with no login

DELIVER

- An automatic system, based on tracking events, sends email notifications to recipients to inform them of imminent receipt and delivery of their mail or package
- Electronic proof of delivery can be captured by recipient signature on the mobile terminal, or photo capture of signature on the tracking label or delivery manifest

RECORD

- Pre-defined reports monitor the volumes processed and export data for specific processing on a spreadsheet application
- Tracking process reports identify opportunities to improve efficiency
- Delivery performance can also be monitored with tracking reports

Mobile Terminals

The mobile terminal delivered with the Track Inside solution features:

- Rugged PDA-type handheld designed for intensive professional use
- Ingress protection (IP) grading and shock tolerance to resist accidents and limit breakdown
- The 'imager' barcode scanner makes it possible to read all 1D and 2D barcodes very quickly and capture photos
- Mobile application is entirely touch-sensitive and makes full use of the 3.5 inch screen offering excellent readability even for outdoor operations
- Wi-Fi connectivity gives you the ability to send all of the data captured in the field to the tracking database in real-time

Options

We recommend the following options for maximum convenience and efficiency:

Barcode scanner

that can be connected very easily to any computer equipped with a USB port. This barcode scanner has a trigger and is delivered with a stand allowing you to use it as a fixed scanner.

Label printer

to print tracking labels for objects without barcodes and/or objects with multiple barcodes. This very compact direct thermal printer functions with 10x10cm or 10x15cm roll labels.

Why choose Neopost?

Neopost make it easier to send and receive mail and emails so you can connect better with your external and internal customers. Our equipment and advanced software can help you reduce costs, grow your business, manage digital communications and comply with latest legislation.

We can assist with design, production and distribution of transactional and marketing mail.

And when customers respond we make it simple to process, track and store documents and emails.

Our team of expert Account Managers will tailor solutions to meet your needs. An extensive support network of field engineers, contact centre and on-line tools are available to ensure our solutions keep delivering.
